# History of Web Layout

Tables

Float

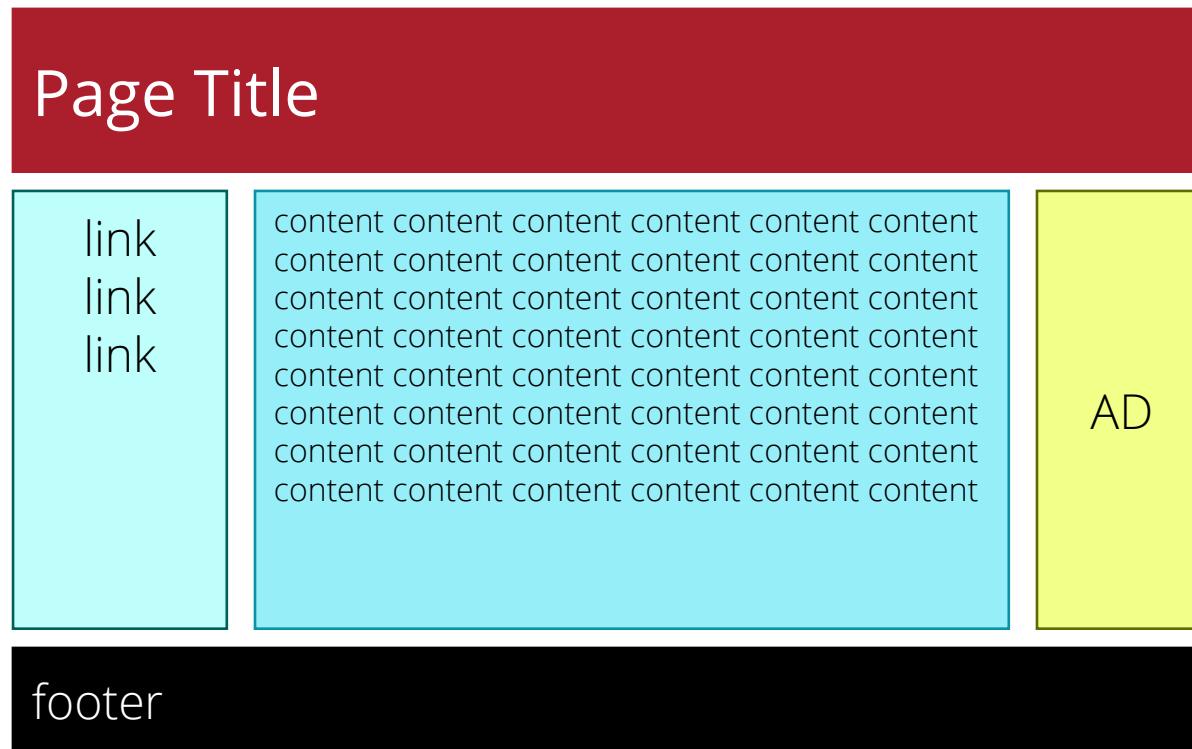

Flexbox

Grid

# Centering

I am a centered block of text  
on the page that spans more  
than one line!

# The Holy Grail Layout

# Not Holy

# Page Title

link  
link  
link

AD

footer

## HTML

```
1 <div class="container">
2   <p>Child one</p>
3   <p>Child two</p>
4   <p>Child three</p>
5   <p>Child four</p>
6   <p>Child five</p>
7   <p>Child six</p>
8 </div>
```

Child one

Child two

Child three

Child four

Child five

Child six

## CSS

```
1 p {
2   padding: 5px;
3   margin: 0;
4   border: 1px solid black;
5 }
```

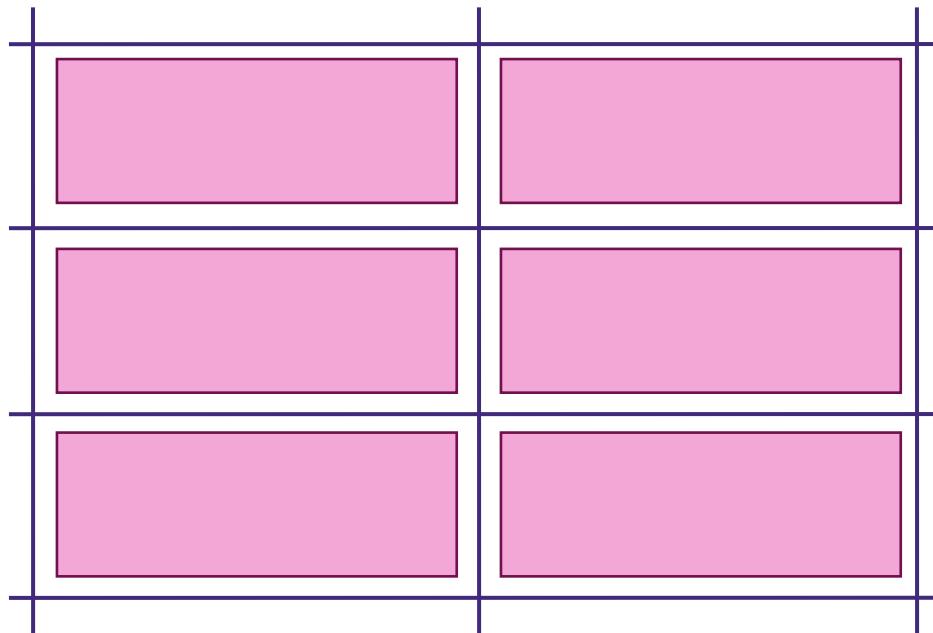

# Grid layout

```
<div class="container">  
  <p>Item 1</p>  
  <p>Item 2</p>  
</div>
```

container这个class底下的 P都以grid的形式来展示

```
.container {  
  display: grid;  
}
```

# Grid

# Rows and columns

grid-row-start: 1;

grid-row-end: 3;

grid-column-start: 2;

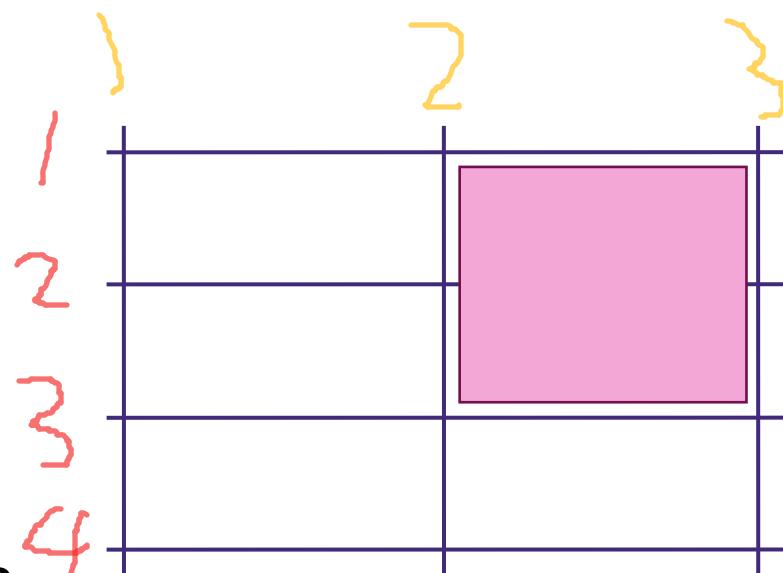

grid-column-end: 3;

grid-row: 1 / 3;

grid-column: 2 / 3;

grid-area: 1 / 2 / 3 / 3;

我感觉这里的数字是以边来算的，而不是以格子

# Holy Grail

```
<body>
  <header>Site Logo . . .</header>
  <nav>Links . . .</nav>
  <main>Lots of content . . .</main>
  <footer>Stuff . . .</footer>
</body>
```

# Holy Grail

```
<body>
  <header>Sit
  <nav>Links
  <main>Lots
  <footer>Stu
</body>
```

```
body {
  display: grid;
  grid-template-columns: 200px 1fr;
}
header { grid-row: span 2; }
footer { grid-row: span 2; }
```
